

## BACK TO BASICS

At Close Air Solutions we not only embrace simulation and high tech methods of learning and operation, we value good basic tools. For this reason we designed the CAS Rule – A Multi-Purpose CAS planning tool for JTACS and JFOs.

## DESIGNED AND RATIFIED BY THE COMMUNITY

It is made by JTACs and JTAC-Es for JTACs and JFOs, it is designed to be an all in one ruler and protractor for CAS planning with multiple advanced features. It is **tough**, small and durable and compatible with existing JTAC equipment and maps. The ruler has been tested by multiple JTAC-I and JTAC-E personnel from a multitude of NATO countries and is now in for full scale production.

## CAS RULE FEATURES

- ⊕ Degrees Scale – on all read-off points of significance
- ⊕ Occultations preventing incorrect readings of reciprocal values
- ⊕ Laser Arc Plotting and Calculation
- ⊕ Laser Target Line Calculation
- ⊕ Friendly Forces Line – ‘From Target’ Bearing and Distance
- ⊕ Instant Cross Range LoA Calculation and Reciprocal
- ⊕ Size 12.5 by 17cm – weight 0.82 grams / 2.89 oz
- ⊕ Km radius drawing for 1:50k and 1:25k
- ⊕ nm scale for 1:50k and 1:25k
- ⊕ Risk Estimate Circle Drawing for 1:50k and 1:25k
- ⊕ Roamers for 1:50k and 1:25k
- ⊕ Meters to feet conversion
- ⊕ Speed Distance Time calculations at 420, 480, 500, 520kts
- ⊕ **Compatible with Rite in the Rain binders**

## IF YOU WANT ONE...

The CAS Rule is a bespoke and carefully designed tool that is made in small quantities. Units will be available in Q3 2015 and are expected to be sold at:

**SPECIAL INTRODUCTORY OFFER FOR THE FIRST 1000 UNITS: \$40 (or £25 UK)**

Afterwards:

- ⊕ **\$100 per unit** for orders of less than 50
- ⊕ **\$80 per unit** for orders of greater than 50

Postage and Packaging is additional and dependent on quantity and shipping destination
