

CAS Rule – JTAC Planning Tool

Back to Basics

At Close Air Solutions we not only embrace simulation and high tech methods of learning and operation, we value good basic tools. For this reason we designed the CAS Rule – A Multi-Purpose CAS planning tool for JTACS.

Designed and ratified by the community

It is made by JTACs and JTAC-Is for JTACs, designed to be an all in one ruler and protractor for CAS planning with multiple advanced features. It is tough, small and durable and compatible with existing JTAC equipment and maps. The ruler has been tested by multiple JTAC-I and JTAC-E personnel from a multitude of NATO countries and is now ready for full scale production

CAS Rule Features

- Degrees Scale – on all read-off points of significance there are occultation’s that prevent incorrect readings of reciprocal values
- Laser Arc Plotting and Calculation
- Laser Target Line Calculation
- Friendly Forces Line – ‘From Target’ Bearing and Distance
